

Guide to Seed Treatments

Treatment	Seed	Disease / Pest	Recommendations
GAUCHO 600	Canola	- Protect Canola Seedlings from early season aphid damage	<p><i>csG recommends treating Wheat with a combination of the Vibrance fungicide and the Gaucho insecticide. This treatment mix protects seeds, young seedlings and roots from a range of diseases, and offers very reliable insect and stored grain pest control.</i></p>
	Lupins	- Gaucho will protect emerging seedlings from Redlegged earth mite & Blue oat mite for 3-4 weeks after sowing	
	Barley	- Control feeding damage caused by wheat aphid & corn aphid - Spread of barley yellow dwarf virus	
	Oats	- Protection against insect pests of stored grains: Granary weevil, Indian meal moth, Lesser grain borer, Rice weevil, Rust-red flour beetle, Sawtoothed grain beetle, Tropical warehouse moth	
	Triticale	- Gaucho will control insect pests during the storage of cereal grains to be used for seed only	
	Wheat	- Gaucho will control insect pests during the storage of cereal grains to be used for seed only	
HOMBRE ULTRA	Barley & Oats	- Covered & loose smut - Feeding damage caused by wheat aphid & corn aphid - Spread of barley yellow dwarf virus - Protection against insect pests of stored grains: Granary weevil, Indian meal moth, Lesser grain borer, Rice weevil, Rust-red flour beetle, Sawtoothed grain beetle, Tropical warehouse moth	<p><i>csG recommends treating early-season Oats with Hombre Ultra. Hombre is a combination of the fungicide Raxil & the insecticide Gaucho. It controls a variety of smuts, provides long lasting protection against cereal aphids, and controls stored grain pests.</i></p>
	Wheat	- Hombre will control insect pests during the storage of cereal grains to be used for seed only	
		- Bunt, seed & soil borne flag smut, loose smut	

Treatment	Seed	Disease / Pest	Recommendations
MAXIM XL	Canola	<ul style="list-style-type: none"> - Pythium - Rhizoctonia Solani - Suppress Seedling Blackleg - Control of Seedling Blackleg (when combined with Saltro) 	<i>csg</i> recommends treating Canola with a mix of Maxim XL fungicide and Gaucho 600 insecticide. This treatment combination suppresses a range of diseases and protects seedlings from aphid damage and mites.
RAXIL T	Barley & Oats	<ul style="list-style-type: none"> - Covered & loose smut - Protection against pests of stored grains: Granary weevil, Lesser grain borer, Rice weevil, Rust-red flour beetle, Sawtoothed grain beetle 	
	Wheat	<ul style="list-style-type: none"> - Bunt, flag smut (Seed & soil borne), loose smut 	
SALTRO DUO	Canola	<ul style="list-style-type: none"> - Control of Seedling Blackleg - Damping off and rot root (Pythium spp. Rhizoctonia Solani) 	
VIBRANCE	Barley	<ul style="list-style-type: none"> - Covered Smut - Net Botch, seed-borne 	<i>csg</i> recommends treating Barley with the Vibrance fungicide, which will control smuts, bunts and a range of other diseases. Vibrance encourages crop growth and a healthy seedling establishment.
	Oats	<ul style="list-style-type: none"> - Control Loose Smut - Pythium Root Rot - Suppress Rhizoctonia Root Rot (bare patch) 	
	Triticale & Wheat	<ul style="list-style-type: none"> - Common Bunt - Seed & soil borne Flag Smut - Suppress seedling rots by seed borne Fusarium head blight - Suppression of seedling rots by white grain
